CEDAR

Online Information Portal

MAKE YOUR MARK

We believe that parents/guardians play an important role in our students' success. CEDAR is our new website-based system for tracking student performance and attendance that **parents and guardians can access too.**

If you haven't received a CEDAR email and text please email:
Cedar@stokesfc.ac.uk

If you haven't received a CEDAR email and text please email:
Cedar@stokesfc.ac.uk

1. You can see your son/daughter's grades

Teachers use Cedar to record progress point data giving you a data-rich window on your son/daughter's progress against Minimum Expected grades (MEGs) based on national datasets.

2. You can track their progress and attendance, no matter where you are.

As Cedar is a web-based program, you can access it anywhere with an internet connection, and on any platform – desktop, tablet, mobile phone. That means even if you're away at work, you'll still know if they made it to today's lessons.

If you haven't received a CEDAR email and text please email:
Cedar@stokesfc.ac.uk

3. You can find out the background details by reading their pastoral log.

Praise, problems, commendations, concerns, they're all posted in the pastoral log. There is no quicker way of finding out what teachers are thinking.

4. You can contact their teachers directly.

If you find something you want to discuss with their teachers, you can email them directly via Cedar. Teachers will see the message as soon as they check their college email accounts.
