TASK

Sociology Tasks:

1. Define the terms **crime** and **deviance**.
2. State whether you think an array of different actions are crimes, deviant acts, both, or neither.
3. Outline things that may or may not be crimes at one time but not another, or in one place but not another.
4. Provide reasons that crime statistics on the charts may not be valid.

Psychology Tasks:

1. Using the PowerPoint slides (slide 14/15) - access the image of 'Johnny aged 14 who has recently been arrested for several crimes'
2. Using the images on the worksheet, annotate with suggestions as to why Johnny may have committed these crimes
3. Using slide 16—check your own suggestions with those in the table—annotate whether it is a 'Biological Reason' or a 'Non-Biological Reason' - add any reasons in you haven't included already!
4. Move to slide 17—identify ways you think we could reduce criminality—think about how you could tackle some of the reasons you have generated
5. Check your suggestions on slide 18
